 **TERRAIN** Quite simply, this walk goes uphill, follows the edge of the Wold and returns down to the village. A woodland path winds up, past Cleo through a clearing, through woodland again, up steps and up onto the road, this initially goes down and then steadily up and along Middlegate. There is no pavement but good verges to step onto if traffic is encountered. From point 12 grass underfoot leads downhill with one short steeper section. The area near Fountain Corner is quiet, fairly level.
